

At our manufacturing facility in Perry, Oklahoma, we control the research, design and manufacturing of every piece of equipment in our comprehensive product line. So, when you visit your Ditch Witch dealer, you can be sure that the parts you buy meet the standards of quality and excellence that have defined the Ditch Witch organization for more than 50 years.

**Hydraulic Cylinder Kit.**

For maintenance and repair of hydraulic cylinders.

**Piercing Tool Oil.**

Maximize the performance of your Ditch Witch piercing tool by applying the proper lubrication.

**Engine Mufflers.**

Replacement mufflers for all sizes of Ditch Witch equipment.

**Ditch Witch Manuals.**

Equipment manuals are available for all Ditch Witch models.

**Filters.**

Increase the life of your equipment by replacing all hydraulic and fuel filters with genuine Ditch Witch parts.

**Piercing Tool Heads.**

Prolong the life of your piercing tool by using the appropriate head for the soil conditions.

**Push Rods.**

Replace the rods of your rod pusher at regular intervals for maximum performance.

**Alligator Bit/Bit Blocks.**

For tough digging conditions. Keep your digging chain sharp by replacing individual bits when they become dull.

**Plow Blades.**

Your Ditch Witch dealer carries a wide variety of replacement plow blades.

**Chain Tightener.**

The tool you need to repair or replace Ditch Witch digging chain.

**Chains and Binders.**

For securing equipment to your trailer.

**Roto Witch® Bits and Rods.**

Replace bits and rods at regular intervals to ensure maximum effectiveness.

**Drive Chain.**

A kit for replacing the entire digging system chain and/or individual teeth.

**Bearings.**

Replacement bearings selected exclusively for your Ditch Witch machine.

**Pulling Clevis.**

Used to hook up the pulling grip during pullback of product.

**Pulling Grips.**

Attach these to a pipe to pull it underground.

**Belts.**

Check and replace belts regularly to prevent costly downtime.

**Replacement Seats.**

Operator comfort is essential for those long days behind the controls. Your dealer has the right seat for your Ditch Witch machine.

**Chain Tools.**

For removing or replacing bits and chains.

**Trench Cleaner.**

Used for cleaning out the trench.

**Tool Joint Compound.**

Keeps tool joints lubricated and functioning at peak performance.

**Housings.**

Protects the beacon from debris and wear during directional drilling and allows the attachment of drilling bits.

**Bolt-on Shark Teeth.**

For tougher digging conditions, add a few Shark Teeth to a standard digging chain.

**Manual Compartment.**

Keeps your equipment manuals out of the elements and handy for easy reference.

**Drill Pipe.**

Strong, flexible Ditch Witch drill pipe provides maximum performance when installing utility service lines.

**Tires.**

A complete line of tires rated specifically for your Ditch Witch unit.

**Rubber Tracks.**

A complete line of rubber tracks designed specifically for your Ditch Witch unit.

**ProLine Sprockets.**

ProLine sprockets allow you to use Ditch Witch digging systems on more than 65 trencher models, including Case™, Vermeer™, Bobcat™, and Burkeen™.

**Sprockets.**

Ditch Witch sprockets are hammer-forged and induction heat-treated for a harder, more durable surface and a softer, shock-resistant core.

**Swivels.**

Used in directional drilling during pullback, swivels keep the pipe from binding up. For all HDD equipment up to 80,000 lb.

**Grease.**

Make sure all grease points are well-lubricated during regular maintenance intervals.

**Fluid Miser® Pipe.**

Patented Fluid Miser pipe has a PVC liner that reduces fill time and helps minimize cleanup.

**Breakout Grips.**

Essential for holding drill pipe in place during makeup and breakout.

**Gauges/Safety Modules.**

We offer a complete line of gauges and safety modules for all Ditch Witch machines.

**Field Service O-Ring Kit.**

Includes 46 of the most common o-rings, packaged in an easy-to-use, impact-resistant box.

**SAE/ORS O-Ring Kit.**

O-rings for 15 of the most common SAE/ORS fittings, packaged in an easy-to-use, impact-resistant box.

**Teeth.**

Independent tests show that Ditch Witch digging teeth last 29 percent longer than those of other manufacturers.

**Decals.**

Keep your equipment looking like new by replacing the decals.

**Ditch Witch Paint.**

Keep your equipment looking showroom sharp with our special black and orange Ditch Witch paint.

**Nozzles.**

Used on the housing and backreamers, these nozzles regulate the amount of water used during boring.

**Digging Booms.**

Quality Ditch Witch digging booms hold your trenching chains on tight.

**Wheels.**

A complete line of wheels rated specifically for your Ditch Witch unit.

**Weights.**

Designed specifically for Ditch Witch equipment.
