Update Your Air Seeder **NEW** Secondary Tower System

- Twist off lid: No tools required
- No Rust! Poly rubber design
- Fits 5-12 Port manifolds for Flexi-Coil and John Deere Secondary Towers

Secondary manifolds with 1" diameter lines evenly distribute the seed or fertilizer from the primary manifold(s) to the furrow openers.

Secondary Manifold Features:

- Made of durable, maintenance free ethylene-propylene molded rubber
- Rust resistant, important when applying fertilizer or treated seed
- Easier to service with an easy to remove lid, no tools required
- No long bolt in secondary tower
- Lid tethered to manifold
- Numbered outlet ports
