

The Hyster® W40Z is redefining navigation in small spaces. The attributes of this general-purpose Walkie greatly enhance maneuverability on crowded loading docks and inside narrow trailers.

W40Z

Standard W40Z with "creep speed" function allows truck to run with the control handle in the full "up" position, giving operators better visibility by placing them closer to loads.

Fingertip control of all truck functions with either hand aids steering and pallet positioning in tight spots.
