

The Rail King[®] Advantage

FEATURES AND BENEFITS THAT MAKE RAIL KING YOUR BEST CHOICE FOR RAILCAR MOVERS...

- 80% of all components can be obtained from local suppliers instead of the factory, making it easier for the end user to reduce total cost of ownership.
- 2" Thick Fabricated Steel Bumpers – Lowest part on the machine, in case of derailment the Rail King will land on its bumper not the rail wheels.
- Inboard planetary multiple wet-disc brakes - Protected from contaminants, spark free for hazardous environment; automatic adjustment for reduced maintenance.
- Patented cushion coupler system, full floating frame and cab result in a Rail King which produces less machine shock and a smoother ride for the operator.
- 50 CFM Compressor – Provides needed air pressure to quickly charge the train air braking system. Two Bendix Air Dryers are standard on all models.
- Stainless Steel Sand Boxes W/8 air operated sanding tubes – Will not rust, designed for easy clean out, and can be easily replaced if damaged.
- Standard Lug Tires (Not a Patented Lug Pattern) – Mounted with inside split rims for additional safety in case of a blow-out. Tires costs are substantially lower than our competition.
- Independent Road Arm Assemblies – making it easier to place the Rail King on and off the rails, even on a curve.
- 28" Rail Wheels – bolt on and off style making it easy to rotate for even wear and increased rail wheel life.
- Paint – Rail King Parts are painted before final assembly, and then repainted, drastically cuts down on rust. Rail King doesn't paint hoses and other components that can make maintenance more difficult.
- Cab Platform – wider than the cab to protect the sheet metal. Walkover platform and stair step ladders so switchman can cross the machine, not the train tracks.
- Couplers – Two weight transfer couplers made of fabricated steel (no casting, no rollers)

Your Material Handling Solutions Provider!

Rental

- Gas, LP, Diesel, and Electric
- Short and Long-term
- Forklifts, Rough Terrain Trucks, Sweeper Scrubbers, AWP's and More!
- Big Trucks

Service

- Repair for all Makes and Models
- Factory Trained and Certified Technicians
- Road Service or Shop Repair Available
- 24-Hour Service

Hyster

- Gas, LP, Diesel, Electric
- Riders, Narrow Aisle, Walkies and Pallet Trucks
- 2,500 to 105,000 lb. Capacity
- Full Line of Attachments Available

Fleet Management

- Free Fleet Analysis
- Fleet Management and Reporting
- Total Maintenance and Repair
- Planned Replacement

Parts

- Parts for All Makes and Models of Industrial Equipment
- OEM and Multiple Line Replacement Parts

ReSales

- Large Inventory of Rental Retirements and Trade-ins
- Limited Warranties Available
- www.mhusedequipment.com

Rail King

- Rail Car Movers
- Safety and Protective Features
- Operator Training Available

Training

- OSHA Compliant Operator Safety Training
- "Train-the-Trainer" Courses
- Technical and Safety Training

Financing

- Competitive Traditional Purchasing
- Rent-to-Own and Lease Programs
- Lease with Full Maintenance Options

Specialty Equipment

- Dock Equipment
- Rack Systems
- Security Cages, In-plant offices
- Compactors, Bailers, and Waste Reduction Equipment

Mariotti

- World's Smallest Forklift
- Compact Electric Riders
- As Narrow as 31" Wide
- Capacities up to 2866 lbs.

PowerBoss

- Sweeper/Scrubbers
- Walk-behind Powered Sweepers and Scrubbers
- Riding Sweepers and Scrubbers

Genie

- Aerial Lifts
- Material Lifts, Personnel Lifts, Runabouts
- Trailer Mounted Booms, Articulating Booms
- Telescopic Booms, Scissor Lifts, Light Towers
