

Regional International Welcomes Continental Mixer to our Family of Products and Services

International is proud to introduce integrated Continental Mixers. As the latest addition to the Navistar family, Continental Mixer will provide International and Continental customers a truly integrated truck as well as one-stop purchasing, service, warranty and support. Continental mixers offer the following advantages:

Confidence

- Continental Mixers are designed to provide maximum stability both on and off the road.
- A lower profile front pedestal reduces the center of gravity, increasing roll-stability.
- Bridgesaver axles offer an exclusive taper roller bearing design, increasing stability when the axle is down.

Long Life

- Continental Mixers are engineered for a long life of service, improving your bottom line.
- The fabricated drum head provides 13% less wear than a similarly spec'd dished drum head.
- A wide-base front drum pedestal distributes load more uniformly, resulting in less stress on pedestal and truck frame.
- The rear pedestal is reinforced with internal gussets.
- The Bridgesaver axle is constructed with a "Box I-Beam" design, increasing its strength.

Complete Integration

- Both WorkStar and PayStar bodies are completely integrated with Continental Mixers.
- You get the advantages of one-stop purchasing, servicing, and support at select International dealers.
- On WorkStar, both body and chassis problems can be diagnosed through the chassis electrical system.
- Also on WorkStar, the driver is alerted if the truck exceeds 10 mph and the drum is not turning, the chute is not locked or the air hopper is raised.

Regional International salesmen trained in Continental Systems and Components:

Truck Sales

Bob Sisbarro

Office: 585-359-2011 x 2229

Email: bsisbarro@regionalint.com

Part Sales

Eric Kunai - Geneva NY & Syracuse NY

Cell: 315-558-2784

Email: ekunai@regionalint.com

Joe Caliano - Buffalo NY & Rochester NY

Cell: 716-912-8387

Office: 716-681-9500
