PERFORMANCE PM

Can change the way you do business

QUICK LUBE (30-PT. INSPECTION)

This basic service inspection includes an oil change, chassis lubrication and a review of 30 everyday operational items such as fluids, wipers, air conditioning, brakes, instrument panel, etc.

"A" SERVICE (71-PT. INSPECTION)

In addition to a lube and oil change, this more advanced inspection includes a complete cab interior inspection, a total inspection around the vehicle to check the condition of everything from mirrors and mud flaps to the exhaust and tires. We'll also do a thorough under-vehicle inspection to check transmission levels, springs and other vital systems.

"B" SERVICE (83-POINT INSPECTION)

This inspection includes all of the above procedures and satisfies all of the Department of Transportation annual inspection requirements. As with all of the Performance PM inspections, only premium fluids and the best parts are used and factory trained and certified technicians perform all maintenance.
