

## Keep the good times going for years!

1. Wash your boat regularly. And if you boat in saltwater, rinse your boat thoroughly with fresh water after every outing to remove salt residue.
2. Never use automotive engine oils or lubes.
3. Perform maintenance regularly. Four-stroke outboards, inboards and stern drive boats require regular oil changes and adjustment. The frequency will vary by model, but a good rule of thumb is to maintain every 100 hours of operation or at least once a year. This will insure safe and reliable fun for every-one.

**Factory Trained Technicians make the difference!**

4. Check the propeller as part of your pre-launch routine (If you have an outboard or stern drive boat).
5. Remove the propeller several times during the season to make sure discarded fishing line hasn't become wrapped around the propeller shaft. If it has some line on the shaft, have us inspect the gear-case, because fishing line can cause gear-case leaks.
6. Always check your trailer lights and wheel bearings. Carry spare bearings and tools to replace them on the road.

### Care & Cleaning

- A long-handled boat brush can make washing your boat pretty easy. A boat with a clean hull bottom is more fuel-efficient than a hull that's covered with algae or other aquatic scum. You can find all the things you need at great prices in our discount marine stores.

### Knowledge & Experience

- Have a question? Our service, parts and accessory pro's can help. Over 100 years of combined experience really shows. Call 888 278-1991 today!

### Tips for Better Boating

- Always carry a basic tool kit, electrical tape, wire and basic spare parts on your boat.
- Store our phone number & Sea Tow's in your cell phone so you can call us from the water.
- Keep a spare set of keys and drain plug in your tow vehicle's glove box. Saves a trip back home if you forget them.

### Insurance Repair Experts

- Did you know we welcome all insurance company claims. That's right, just call us and we'll handle everything for you.
