MILES AHEAD

**TURNS OUT IT IS
EASY BEING GREEN.**

THESE DAYS, EVERYONE WANTS TO DO THE RIGHT THING.

FOR THE PLANET.

FOR FUTURE GENERATIONS.

FOR THE COMPANY.

FACT IS, YOU STILL HAVE TO GET THE JOB DONE.

THAT'S WHERE THE INTERNATIONAL® DURASTAR™ HYBRID
COMES IN.

MORE FUEL-EFFICIENT.

REDUCED EMISSIONS.

IMPROVED ACCELERATION AND BRAKING.

AND, OF COURSE, ALL THE RELIABILITY YOU EXPECT
FROM INTERNATIONAL.

DESIGNED TO KEEP YOU MILES AHEAD,

AND MOTHER NATURE VERY HAPPY.

DECREASE YOUR CARBON FOOTPRINT. MILE AFTER MILE.

The International® DuraStar™ Hybrid is nothing less than revolutionary. Marrying legendary International durability with state-of-the-art hybrid technology.

Whether you need a truck for delivery, emergency or utility work, the DuraStar Hybrid outstanding fuel economy can save you nearly \$5,000 a year. And as good as it is for your bottom line, it's even better for the planet by reducing harmful emissions. It's even approved to use bio-diesel, a blend of clean-burning fuel made from renewable resources like diesel fuel and vegetable oil.

Better yet, DuraStar Hybrid incorporates the same features that made DuraStar's reliability legendary. Synchronized and extended service intervals maximize uptime. While the Diamond Logic® Electrical System keeps maintenance costs down with advanced self diagnostics.

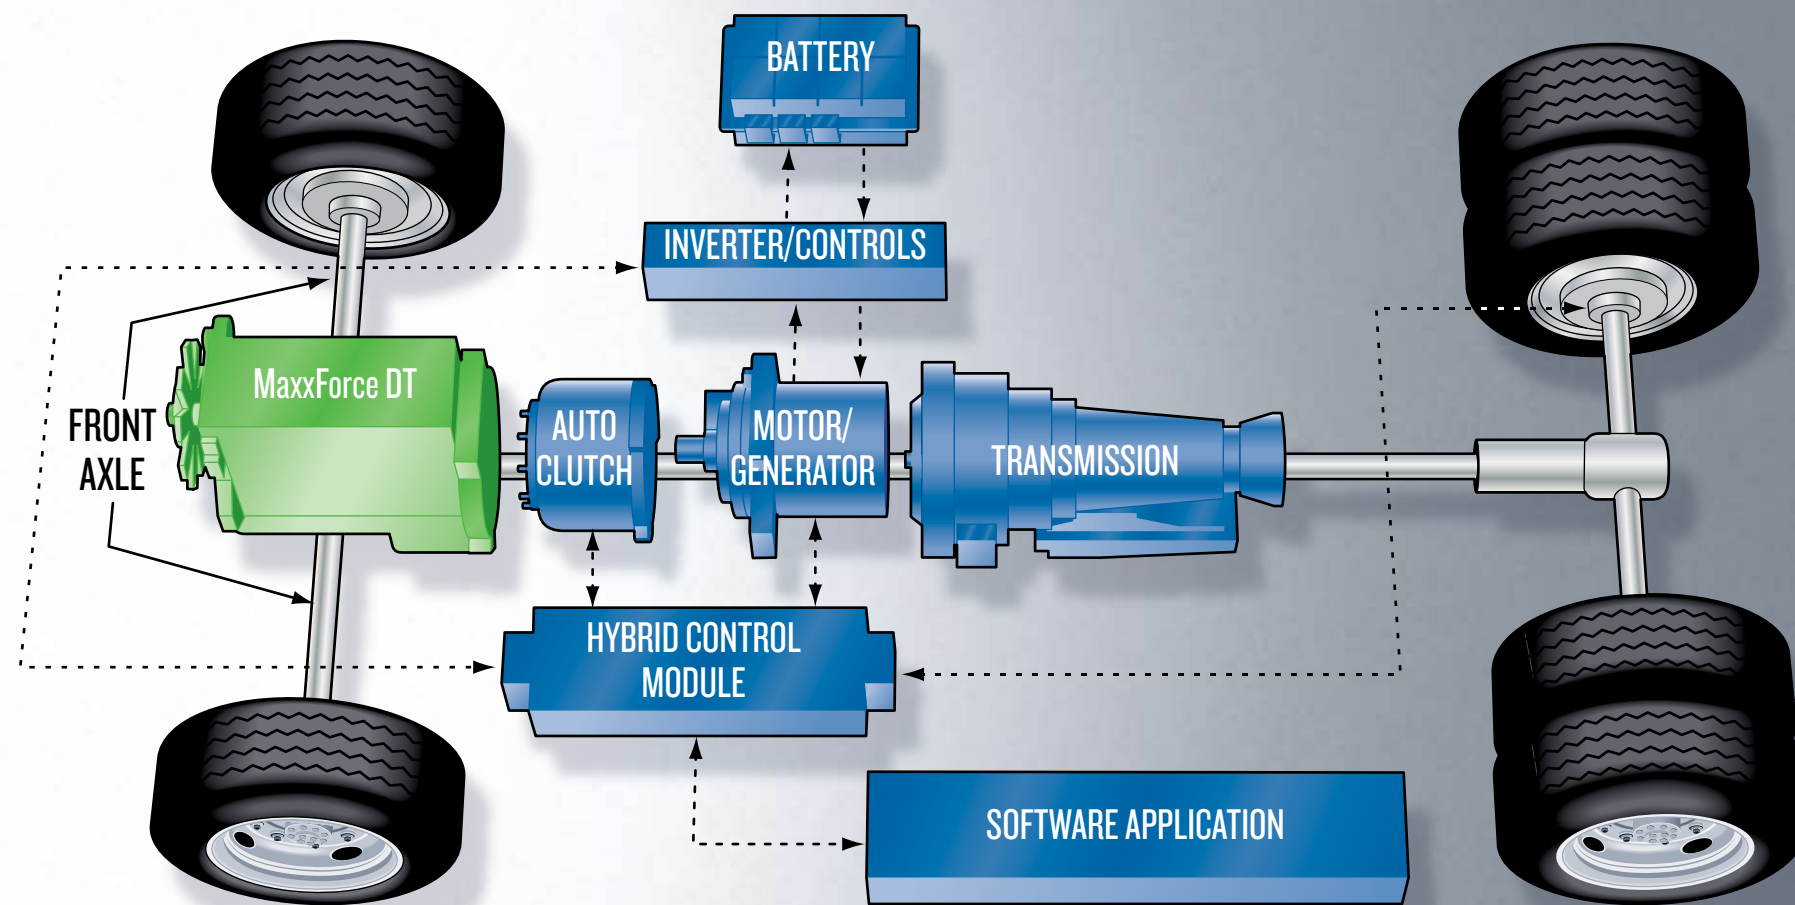

The International DuraStar Hybrid. Helping to make both worlds, the one you work in and the one you're saving, better places to be. Leaving us all miles ahead.

BOTTOM LINE

- 65% reduction in hydrocarbon emissions, 58% reduction in carbon monoxide and 41% reduction in nitrogen oxide emissions make it the cleanest truck in the industry.
- Up to 60% improvement in fuel economy compared to traditional diesel engines.
- Reduced noise pollution with optional Electronic Power Take-Off (EPTO). Which keeps the engine off during stationary work.

WE PAINT THE ENGINE BLUE, BUT ITS SOUL IS ALL GREEN.

Delivery trucks. Beverage trucks. Utility trucks. They all see their fair share of stop-and-go city traffic. And while you hate getting stuck in it, the DuraStar™ Hybrid loves it. In fact, city traffic is the perfect environment for the hybrid system to run most efficiently.

The key to the powertrain's efficiency is the Hybrid Drive Unit (HDU). While braking, torque passing through the transmission turns the generator in the HDU to recharge the battery. Then, when pulling away, the truck uses the torque created by the electric motor to get the vehicle moving.

Once up to speed, the MaxxForce™ DT takes over. With legendary longevity and synchronized and extended service intervals, the MaxxForce DT helps lower operating costs while delivering the superior performance you expect from a MaxxForce. It also exceeds stringent EPA diesel emissions standards.

The International DuraStar Hybrid. Better fuel economy. Better performance. Decreased emissions. Being green pays. In more ways than one.

BOTTOM LINE

- Improved acceleration: from 0-60 mph, it's 9 seconds faster.
- Regenerative braking enhances stopping power and reduces brake wear by using the electric motor to slow the vehicle.
- Approved for bio-diesel, a blend of clean-burning fuel made from renewable resources like diesel fuel and vegetable oil.
- Parallel hybrid system means the diesel powertrain remains fully functional in the unlikely event the Hybrid Drive Unit goes offline.

MaxxForce™ DT

AN INTERIOR AS ENERGIZING AS THE POWERTRAIN.

When you spend the day behind the wheel of a truck, you need to be comfortable. That's why the ergonomically designed interior of the International® DuraStar™ Hybrid offers the essential comforts that give drivers everything they need to get the job done.

1. Ergonomically designed dashboard with back-lit gauges.
2. Diamond Logic® switch panel lets you control a variety of features.
3. Comfortable, two-toned, high-back seats with integrated headrests.
4. Large pocket and overhead console offer plenty of storage space.
5. Conveniently placed grab handles and offset steps.

MEET THE BRAINS BEHIND IT ALL.

It's the Diamond Logic® Electrical System—a technology that provides control and communication between major areas on the International® DuraStar™ Hybrid. And what it has to offer is pure genius.

Fully-integrated, Diamond Logic helps improve uptime with self diagnostics that make repairs quick and easy. So you spend your time on the road, where you belong.

It also comes with a number of programmable features. Our standard convenience package offers things like a built-in parking brake alarm and wiper speed control. And if you're looking to customize, you can choose from options like a warning light that tells you the cargo door's open, or a drive-time meter that shows you how many hours the truck's been in use.

Simply put, Diamond Logic does it all. Protecting the driver, the equipment, and the wallet. Brilliant.

NAVISTAR® ELECTRONICS

BOTTOM LINE

- Standard convenience package comes with built-in features like parking brake alarm, pre-trip exterior light checks and wiper speed control.
- Customizable features include a door open warning light that prevents temperature loss, cargo spoilage and theft.
- Integrated body locks secure the cab and body doors at the touch of a button.
- AWARE Vehicle Intelligence™ provides integration of wireless communications, vehicle-monitoring systems and GPS technology. Increasing uptime and productivity, and reducing operating costs.

**WE'VE GOT YOUR BACK,
YOUR FRONT,
AND EVERYWHERE IN BETWEEN.**

DEALER NETWORK

With nearly 900 dealer locations nationwide, International® offers the industry's largest network of truck experts. Wherever your trucks may roam, we're right there with you.

PARTS AND SERVICE

To stay miles ahead, you need expert service, from people with extensive knowledge, experience and training. The International dealer network has exactly what you're looking for. With premium quality parts available nationwide, the latest in diagnostic technology that can quickly assess a truck's situation, and specialized tools that can handle any repair, our goal is simple—get trucks back on the road fast. For more information and helpful tools, including Performance PM, a program to help manage your regular maintenance, talk to your International dealer.

NAVISTAR
FINANCIAL

Only Navistar Financial offers the simplicity of complete truck and trailer financing. With nearly 60 years in the transportation industry, it's exactly what people have come to expect. Each customer has unique financial needs, which is why we take pride in tailoring programs to meet those needs.
