BROOMS/LEAVES/WOOD

Recognizing that our customers perform an incredible variety of jobs, Walsh Equipment is proud to have a full line of street sweepers, brooms, leaf vacuums, and wood chippers to help you carry out your task.

SCHWARZE

With more street sweeper models to choose from than any other manufacturer, Schwarze Industries produces, maintains and markets the finest, most durable, quality power sweeping equipment in the world. For over 30 years in the sweeping business, Schwarze Industries has been committed to providing the most comprehensive models for industrial sweeping, mall and shopping center sweeping, airport runway sweeping, street sweeping, milling cleanup and stormwater runoff (PM-10) management.

MODELS

1. A4000- The Schwarze model A4000 is a chassis-mounted, regenerative air sweeper with a 4.3 cubic yard capacity. Because of its relatively compact size, the Schwarze A4000 requires no Commercial Driver's License for operation and offers great maneuverability. The A4000 has a highly efficient blowing system which ensures that even hard-to-reach particles hidden within pavement cracks and irregularities are removed, including the "PM-10 fines" known to contain a high percentage of heavy metals, phosphates and other pollutants.

2. M6000- The Schwarze model M6000 is a heavy duty, chassis-mounted broom sweeper with a 5 cubic yard capacity. It is available in both single-engine (M6000SE) and dual-engine (M6000TE) configurations mounted on a variety of conventional and cabover chassis. For maximum flexibility, the M6000 has a scissor-lift dumping system that offloads debris to the side of the sweeper at operator-determined heights ranging from as little as 16" to as much as 11'6" -- high enough to offload into a highway hauler with sideboards. The sweeping system features a 58" main broom, squeegee-type elevator system, forward-facing digger-type gutter brooms and a 355-gallon dust suppression system. Both single and twin-engine configurations are mounted on a commercially-built chassis for operator comfort and ease of use.

3. A7000- The Schwarze model A7000 is a heavy-duty, chassis-mounted, regenerative air sweeper with an 8.4 cubic yard hopper. Its basic design has had over 10 years of successful operation throughout the United States and around the world. In contrast to mechanical broom sweepers, the A7000 also collects the micron-sized contaminants that accumulate on roads and streets. Additionally, the A7000 has as an optional Mechani-Pneumatic® Powerhood a windrowing mechanical broom which is positioned ahead of the blast orifice of the sweeping head, allowing for better cleaning action of both heavy materials and the fines which are known to be trapped under caked debris. The A7000 is also the foundation for the Schwarze A8000 (high-dump regenerative air sweeper) and the A9000 (heavy duty 9.6 cubic yard hopper regenerative air sweeper).

1. A 4000; 2. M6000; 3. A7000

**SWEEPSTER,
DINKMAR, WOODSMAN**

Sweepster: Whether it's an airport runway on a blustery winter morning or a city street on a scorching summer afternoon, you can count on Sweepster products to handle the harshest conditions. As the largest rotary sweeper manufacturer in the world, Sweepster has always been the leader in quality, durability and innovation. Today, we offer the industry's most complete range of products—everything from hydraulic sweepers to self-propelled brooms to aviation sweeping equipment.

**Leaves/ Wood
Woodsmán Chippers:** Woodsmán's complete line of hydraulic, slow speed drum-style chippers offer innovative concepts and world-class

performance. Each machine is manufactured to exact specifications and incorporates Woodsmán's unique drum with its dual complete knife pockets. Woodsmán began manufacturing drum-style brush chippers in 1994 using customer and industry expertise to create evolutionary changes in the product. Woodsmán's philosophy is to preserve simplicity while maintaining exceptional performance and quality.

Dinkmar Leaf Machines: Dinkmar & Partners offers a variety of quality leaf machines. From pull behind to self-contained, each leaf machine can be customized to fit your needs.

1. Sweepster Universal Quick Hitch Broom; 2. Sweepster QTRACTOR; 3. Sweepster Rear Tow; 4. Woodsmán 2114; 5. Dinkmar Econo Leaf
