# DYNA HAULER®/LDC

## LIGHT DUTY CHASSIS DUMP BODY

The DYNA HAULER/LDC are custom engineered 8-1/2' dump bodies for a light duty chassis with J&J's exclusive 10525, 6-ton hoist with a 5" x 25" cylinder and high pressure gear pump. Our standard 8-1/2' package comes in either steel or aluminum and includes many "ready to work" features such as a 10 ga., high-tensile steel floor (steel body), fabricated rear corner post plus two side posts, low loading height, 24" tailgate, a cab protector and more. And we pay attention to quality and finished appearance. For over 40 years we've listened to the needs of our customers and incorporated their recommendations into our products. Look below for some of the specifications of the DYNA HAULER/LDC dump body.
