SNOW

Whether you need snow and ice treatment equipment for a half ton pickup, or a 35,000 lb GVW dump truck, we have it all. For trucks up to 26,000 lb GVW, Western is the plow for you. Plow models range from 7.5 ft to 10 ft, and Western's Ultra Mount design allows the lift, lights, and plow to go on and off the vehicle quickly. For the larger trucks we offer Gledhill and Wausau plows. The variety of plow, hitch, and wing plow configurations will allow us to meet your needs.

PLOWS

WESTERN

Western: Western Products, located in Milwaukee, Wisconsin, is the leading manufacturer of snowplows for four-wheel drive pickup trucks and sport utility vehicles. For over 55 years, WESTERN® snowplows have been the choice of the professional plower. In addition to snowplows, Western Products produces sand and salt spreaders. Walsh has been proud to sell Western products since 1988.

Models

Pro-Plow and Poly-Pro Plow: 7.5' and the 8' Pro-Plow models are available in both powder-coated steel and maintenance free poly. The 8.5' model is offered in steel only.

Pro-Plus Plow: Designed for heavy-duty commercial and municipal applications the 7.5', 8', 8.5' and 9' Pro Plus fits ¾ ton trucks to F-550 sized trucks.

MVP Plus: The MVP V-Plow is known for its productivity and reliability. It is available in steel or poly in 7.5', 8.5', and 9.5'.

Heavyweight: Heavyweight Plows are designed for all-purpose, moderate-speed plowing, and are a great choice for clearing local streets parks, country roads, and large parking lots.

Wide-out: It's a 9-foot scoop, an 8 to 10-foot straight blade and, with the leading wing angled forward, it delivers the ultimate high-capacity windrowing. At the touch of a button, WIDE-OUT hydraulically transforms to perfectly match every condition, delivering time-saving performance at each jobsite.

GLEDHILL

Gledhill: Gledhill Road Machinery has been manufacturing snow plows since 1930. Walsh has been an authorized Gledhill dealer since 1960. Over the years, Gledhill has enjoyed steady growth. Today, four generations later, Gledhill continues to offer a superior product to maintain your road and streets through a combination of commitment to quality, detail to construction, attention to design integrity, and second to none service.

Models:

Straight Moldboards: Straight moldboards have either a spring bolted baffle or an integral "Built-In Baffle" and are available in uniform heights of 30", 36", 42", or 48", and in lengths of 9', 10', 11', or 12'. Various reversing combinations include three power reversing and two manual reversing models.

Tapered Moldboards: Taper moldboard snow plows are designed for the higher speed method of plowing. Offered in cutting edge lengths of 10', 11' or 12' with three different intake and discharge heights. Moldboards are available with a spring bolted baffle or our integral "Built-In Baffle". May be selected as a fixed one way or as a manual reversible type.

Jet Stream: Gledhill's JETSTREAM™ snow plows are especially made for plowing to the right or left with symmetrically constructed inverted funnel shaped ends causing extreme distance of throw. Offered in 10', 11', or 12' lengths and three different heights

4. Gledhill 11 Ft Jetstream; 5. Gledhill 11Ft Tapered; 6. Gledhill 10 Ft Tapered with Highway Do-All Beds

WAUSAU

Wausau: Since 1996, Walsh has been an authorized distributor of Wausau high-quality plows. As part of the Schmidt Engineering Group, Wausau manufacturers industry leading heavy-duty snow removal equipment.

Models:

One-Way Plows: Wausau one-way trip moldboard plows are designed to clear snow at all speeds. Offered in 10' and 11' ft Wausau's are designed for fast and efficient snow removal with greater snow dispersal achieved by smooth rolled moldboards and high discharges.

Reversible Plows: Heavy-duty reversible, trip moldboard snow plows are an all purpose municipal plow. They can be designed for left or right discharge.

SPREADERS

When Winter weather descends, Walsh is ready to meet all your spreader needs. For smaller trucks and limited de-icing needs, we offer Western's tailgate hitch mounted spreaders with 250 lb to 1200 lb capacity. For trucks up to 17,000 lb GVW, we offer Hi-way Model P slide in hopper units in carbon steel or 304 stainless steel, engine or hydraulic driven. For the larger trucks, we have the Hi-way Super P or E2020 slide in units, and under the tailgate auger spreaders manufactured by Hi-way, Gledhill, and Elkin.

HI-WAY

Hi-Way: Hi-Way is the leading manufacturer of winter maintenance equipment including salt and sand spreaders and multi-purpose dump bodies since 1939. Walsh has been a Hi-Way dealer since 1974. Heavy gauge steel, durable components and easy-to-use design are built into everything we produce. If you're looking for the best in deicing and snow removal equipment...Hi-Way Has It!

Models:

Multi-Purpose Dump Body- XT3

The XT3 spreads deicing materials at the rear or front with the optional front cross conveyor. The flat dump body floor allows hauling of virtually anything, including pallets and barrels. It also dumps with a front telescopic hoist that provides a low center of gravity and eliminates the need for a sub-frame.

V-Box Deicing Spreaders

Model P: Its compact design is intended for use with trucks rated at 8600 GVWR and spreading free flowing materials such as sand, salt or a mixture of both.

Super P: The Hi-Way Super P deicing spreader is commonly found among the fleets of municipalities and townships, contractors, and lawn and landscape professionals.

E2020XT- The Hi-Way E2020XT is the spreader of choice among municipalities for winter deicing. Mounted either on a dump body or truck chassis, the E2020XT features a gear case assembly that quickly removes for faster service.

Do-AL : The DO-AL may be used for year-round road maintenance and deicing because it can spread and bulk discharge up to 8 tons per minute. The rear endgate swings out for bulk dumping or non-controlled flow of material. In addition, the single spinner assembly swings out of the way to eliminate interference with dumping. An optional dual spinner assembly lets you broadcast deicing material.

WESTERN

Models

1. Tornado- The new Tornado poly/electric hopper spreader utilizes a rubber belt conveyor that can handle either salt, sand, or combination material. The built in top-cover doubles as a spill guard.

2. Pro-Flow/Pro-Flow 2- Parking lots aren't a challenge with the Pro-Flow/Pro-Flow 2. The Pro-Flo is designed to handle dry #1 rock salt and calcium chloride while the Pro-Flo 2 handles everything even wet sand. Both have adjustable feed gates and deflectors allowing for a more even spread pattern.

1. Western Tornado; 2. Western Pro-Flow 2

HTC

Improve your bottom line and give yourself the competitive edge with the Hydraulic Truck Conveyor. The economical Hydraulic Truck Conveyor mounts quickly and easily on all standard dump boxes to efficiently deliver material like sand, gravel, or hot asphalt where you want them, when you want them, without the expensive hand labor. Operating the HTC is a simple one-person job that can be handled from the truck cab. HTC discharges from either side, making asphalt patching, highway shouldering, ditch filling, sandbag filling, and road sanding fast and easy.
