### Ten more reasons the Yale MPB040E is the best...

1. Handle Mounting: Bottom mounted design for a more comfortable steering position
2. Hand Grips: Ergonomically developed comfortable handle grip angle
3. Handle Return Spring: Low effort positioning, controlled return to vertical position
4. Service Compartment Cover: Single piece assembly, removable without tools, won't corrode like metal
5. Battery System: 158 AH battery pack with integral 25 amp hour charger
6. Traction Motor: Fully enclosed for greater protection from debris and contamination
7. Speed Control: Solid state, hall-effect sensor
8. Hoist Control: Integral transistor hoist control allows motor to run at a cooler temperature
9. Pallet Exit Roller: Allows forks to lift up and over bottom decks boards
10. Lift Cylinders: Single lift cylinder for fewer adjustments, connections and potential leaks

Above rates include lease payment along with choice of maintenance program. Unit must be returned in good running condition and like appearance. Yale Materials Handling reserves the right to terminate agreement without notice at any time. Price subject to applicable taxes.
