

TIRES FOR TURKEYS

Offer Valid November 1st thru 30th, 2011
(restrictions may apply ask for details)

As a guide (not a rule) if there is less than an inch from the lettering on the cushion tires to the top of the tires, it's time for a change.

- ✓ Reduce operator fatigue
- ✓ Reduce fatigue on transmission
- ✓ Worn tires increase load shock to the steer axle & their components
- ✓ If tires are worn 40% the forklift & operator are absorbing over 84% of the shock
- ✓ As a tire wears its diameter & circumference is reduced. The tire will turn more to cover given distance thereby increasing fuel consumption while reducing speed

FUELING YOUR BOTTOM LINE & BELLY

In this season of gratitude Yale hopes you find some time to smile, laugh, and cherish time with family & friends. Yale Materials Handling would like to extend our "Tires for Turkeys" sale to you, your employees or your family.

For every 2 forklifts you replace a full set of tires on, you will receive a FREE turkey.
